Troubleshooting Kubernetes Clusters

Kien Bui
DevOps & Platform Engineer

Course Overview

Maintaining Kubernetes Clusters

Logging and Monitoring in Kubernetes Clusters

Troubleshooting Kubernetes Clusters

Summary

Troubleshooting tools

Cluster troubleshooting

- Nodes

- Control Plane

- Workloads

Troubleshooting Tools

kubectl logs

kubectl events

systemctl

journalctl

System logs

Troubleshooting - Nodes

kube-proxy

kubelet

Container runtime

systemd

Network reachability

Server online

Node

Kubelet

Kube-proxy

Container Runtime

Managing the kubelet with systemd

```
#Get status of the systemd unit
systemctl status kubelet.service

#Set the kubelet to start on system boot
systemctl enable kubelet.service

#Start the kubelet if it's stopped
systemctl start kubelet.service

#systemd unit configuration
/etc/systemd/system/kubelet.service.d/10-kubeadm.conf

#kubelet ComponentConfig
/var/lib/kubelet/config.yaml
```

Demo

Troubleshooting Node failures

- Stopped kubelet

- Inaccesible kubelet config.yaml

- Misconfigured kubelet systemd unit

Troubleshooting - Control Plane
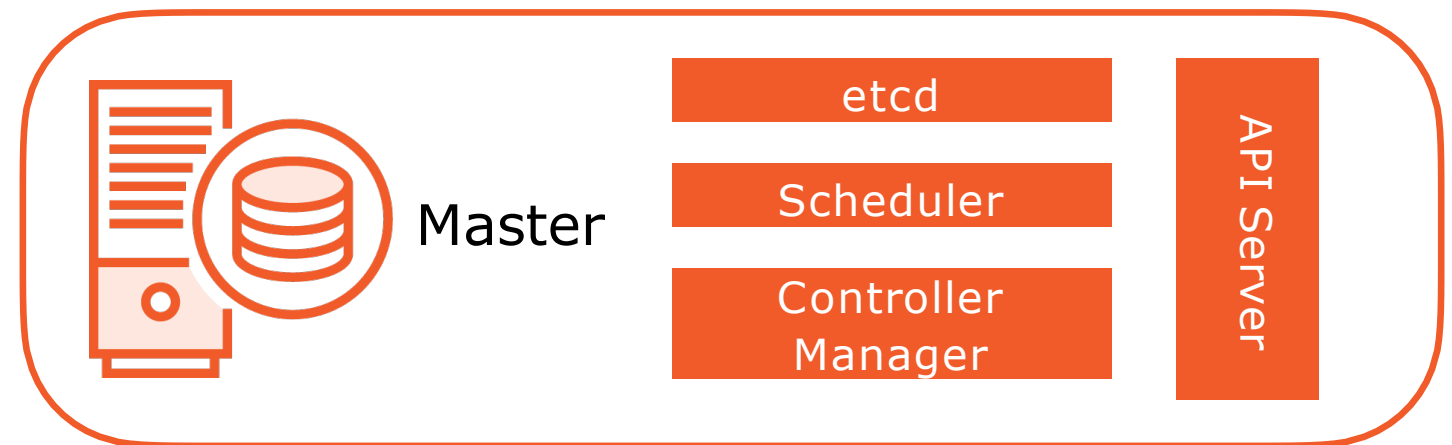

Control Plane Pods

Static pod manifest

kubelet

Container runtime

systemd

Network reachability

Server online

Accessible?

Correct?

Master — etcd, Scheduler, Controller Manager, API Server
/var/lib/kubelet/config.yaml
staticPodPath: /etc/kubernetes/manifests

Demo

Troubleshooting Control Plane failures

- Inaccessible Static Pod Manifests

- Misconfigured Static Pod Manifests

Troubleshooting Workloads

Services	Configuring and Managing Kubernetes Networking, S... Ingress
Scheduling	
	Configuring and Managing Kubernetes Storage and S...
Storage	
	Managing Kubernetes Controllers and Deployments
Deployments	
	Managing the Kubernetes API Server and Pods
Pods
